PROFESSIONAL SUMMARY

Software Engineer with over four years of professional experience developing web applications across the Software Development Life Cycle. Experienced in full-stack development, problem-solving, and collaborative work within team environments. Committed to continuous learning and the practical application of new technologies. Motivated to pursue postgraduate study in Computer Science to strengthen theoretical understanding and expand expertise in modern and emerging computing technologies.

EDUCATION

Bachelor of Science (B.Sc.) in Computer Science

St. Paul's College, Kalamassery — Mahatma Gandhi University, Kottayam
2016 – 2019 | CCPA: 5.78 / 10

Final Year Project — Migrant Labour Identification System

- Designed and developed a web-based system to digitally register and manage migrant worker records.
- Built using ASP.NET, C#, and SQL Server.
- Focused on structured data management, authentication mechanisms, and usability for administrative workflows.

PROFESSIONAL EXPERIENCE

Software Engineer — PanApps International Pvt. Ltd.(formerly Assyst International Pvt. Ltd.)**, Kerala, India | June 2021 – Present**

- Develop and maintain responsive web applications using modern JavaScript frameworks within production environments.
- Contribute to digital platforms developed for international organizations including the World Bank, UNICEF, USAID, and the International Civil Aviation Organization (ICAO).
- Implement interactive dashboards and data visualizations using Highcharts, Chart.js, and D3.js to present complex datasets effectively.
- Work across CMS-driven systems (Drupal and WordPress), supporting application workflows, user management, and backend integration.
- Implement authentication flows and accessibility-focused interfaces aligned with modern web standards.
- Participate in code reviews and mentor junior developers, contributing to maintainable and reliable software delivery.

Software Developer (Trainee → Junior Web Developer) — JENN Software, Kerala, India | Aug 2019 – Apr 2021

- Progressed from trainee programmer to junior developer through structured technical training and project involvement.

- Worked on enterprise applications using Gupta Team Developer (OpenText) with Oracle as the backend database.
- Completed external training in the MERN stack (MongoDB, Express.js, React, Node.js) and contributed to client web applications using modern JavaScript technologies.
- Supported backend integration, API interaction, and database operations within full-stack development environments.
- Assisted in debugging and resolving production issues, improving application stability and reliability.

ACADEMIC & PROFESSIONAL ENGAGEMENT

Editorial Contributor (Part-Time) — Journal of Social Work Education and Practice (JSWEP) | Dec 2021 – Present

- Support editorial and content review activities within an academic publishing environment.
- Assist in structured documentation, formatting, and quality review workflows.
- Gained exposure to academic writing standards and publication processes alongside professional responsibilities.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, C#, SQL

Web & Application Development: React, Next.js, Vue.js, Node.js, Express.js, ASP.NET, PHP, HTML5, CSS3, Bootstrap

APIs & Data Handling: RESTful APIs, API Integration, Authentication Workflows, Data Visualisation (Highcharts, Chart.js, D3.js)

Databases: SQL Server, Oracle, MongoDB

Platforms & Tools: Drupal, WordPress, Git/GitHub, VS Code

Software Practices: Agile/Scrum, Code Review, Testing, Technical Documentation

RELEVANT COURSEWORK & CONTINUING LEARNING

- Google Cloud Digital Leader — Google Cloud Skills Boost
- Python And Django — Horizon Tech

COMMUNITY & SOCIAL INVOLVEMENT

Volunteer Participant — Rosminian Community Initiatives: Participated in charitable and social outreach activities supporting community welfare and service initiatives.
